PERSONAL PROJECTS

1. E-commerce app: <https://catherine-anokwuru.github.io/nativity/>
 - Developed an e-commerce web application using JavaScript.
 - Designed and styled the user interface using SCSS.
 - Implemented search functionality to find products based on user input.
 - Implemented features to filter products according to user preference.
 - Displayed product details dynamically.
 - Applied asynchronous JavaScript technique to enhance efficiency and responsiveness.
2. Company Website for SafeMain Integrated Services Limited: <https://safemain.com.ng/>
 - Designed and developed a professional website for SafeMain Integrated Services using ReactJS.
 - Implemented client-side routing with React Router to enable smooth navigation and user-friendly URL management.
 - Employed CSS design techniques to create a visually appealing and responsive layout for optimal user experience.
 - Integrated the client's email with the contact form using frontend technology, specifically EmailJS, to ensure efficient communication and prompt response.
 - Successfully deployed the application on a cPanel-based website, configuring the hosting environment securely and efficiently.
3. Landing page for an app that connects domestic workers and their clients: <https://catherineanokwuru.github.io/hiredom/>
 - Designed and developed a fully responsive and visually appealing single page website using HTML, SCSS, and JavaScript.
 - Implemented SCSS for improved maintainability and organized CSS structure.
 - Applied CSS Grid for responsive layout design.
 - Utilized CSS design elements to ensure user interactivity.
4. React project: <https://catherine-anokwuru.github.io/backroads/>

- Recreated a tour and travel website using ReactJs.
- Styled the user interface using CSS.
